<sup>1</sup> 2001-2002 FBI *Uniform Crime Reports*

<sup>2</sup> Ohio Bureau of Motor Vehicles

<sup>3</sup> Computation of loss figures: 2002 FBI *Uniform Crime Reports* (latest figures available) estimated 63.1% of the autos stolen were recovered, which means 36.9% of vehicles stolen were not recovered. The FBI also estimated that the unrecovered stolen autos had an average value of \$6,701. To obtain the "Direct Losses-Value of Unrecovered Vehicles" estimates, 36.9% of the number of 2003 motor vehicle thefts for a given city was multiplied by the average dollar amount (\$6,701). These computations do not take into consideration costs associated with damage to the stolen but recovered vehicles, law enforcement, court administration, injuries, or damage to other property.

<sup>4</sup> Numbers supplied by city police departments in OII survey – or – cities weren't listed in FBI's *Uniform Crime Reports*.

<sup>5</sup> OII estimate based on figures supplied from OII survey of city police departments.
